## OVERVIEW

**Ama Dablam 6812M** is renowned as one of the most beautiful and exposed Himalayan mountains in the Everest region. It is a highly sought-after mountain for climbing enthusiasts. Whether you plan to tackle it before or after a bigger expedition like Everest, Ama Dablam is a mountaineering challenge on its own. Many alpinists and mountaineers consider a climb of Ama Dablam to be a "**must-do**" experience.

**Pre-requisite requirements (2 or more 6000M + multi-pitch climbing skills):** Lobuche East & Island Peak, Chulu West, Khumbu 3 Peak expeditions, Cholatse, Aconcagua, Mt. Blanc (Similar 4000M - 6000M peaks or higher), and multi-pitch climb (rock or ice), rock climbing grade up to 5-9+/- to 5.10 a,b,c

From Lukla, our expedition includes a cultural trek through the mesmerizing **Gokyo** lake/valley to the base camp, followed by a climb of Ama Dablam's terrain via technical rock, vertical snow, and ice routes, and breathtaking exposed panoramic views of Everest, Lhotse, and Makalu from the summit. We will ascend Amadablam **via the South West ridge route**, setting up 2 or possibly 3 camps (camp 3 depends on the assessment of our rope fixing team). On summit day, the route involves steep snow and ice slopes with extreme exposure leading directly to the summit.

**History:** Ama Dablam was first summited on 13th March 1961, a Silver hut scientific expedition led by Sir Edmund Hillary. Ama Dablam's expedition has been a dream for many mountaineers. Its Southwest ridgeline is the safest route to climb this amazing peak.

## NAMAS ADVENTURE

### ALPINE GRADING

1 or F: Easy These routes involve easy glacier travel and may require some rock scrambling. Except for the glacier sections, you can often climb rope less.

2 or PD: a little difficult. These routes involve some technical climbing sections and glaciers of higher difficulty. There may also be some short sections of steep terrain. They are good introductory climbs for beginners.

3 or AD : Fairly hard. These are physically demanding routes for experienced alpine climbers. They usually have steep and exposed climbing sections or snow/ice slopes over 50°. The descents are long and more complicated, and most of the route requires to be roped.

4 or D: Difficult. These routes involve sustained rock climbing, ice climbing or snow travel. They are considered a significant undertaking and demand a huge commitment.

5 or TD: Very difficult. Highly technical climbs that involve long distances, remote locations, and hard multi-pitch climbing sections. Besides, there are often other hazards like bad weather (extreme cold, strong winds) or poor protection on the routes.

6 or ED: Extremely difficult. These are extreme climbs (the most difficult in the world, actually!) with continuous difficulties. They take several days to be completed.

### FITNESS GRADING

A - Fitness level to be able to enjoy multi day walks of 6-7 hours per day. Should be able to carry 5-8kg of weight during the activity days.

B - Good level of cardio-vascular fitness and strength fitness needed. Can train by running or cycling 30+ min 3/4 times a week combined with some gym session of endurance or lower body straightening. Should be able to carry 10kgs during the activity day.

C - High level of fitness level required both in strengthening and endurance fitness level. Should be able to carry 8 -12 kgs of load. Training or gym sessions are required to attain this level of fitness. Previous experience of multi-day hill walking is essential.

D - Exceptional level of all round fitness will be required to cope with the exceptionally strenuous nature of these expeditions. Experience is required to be able to take on tours of this physical grading.

E - Exceptional level of all round fitness coupled with ability to cope and resist in highest of the altitude. A resistance to extreme weather conditions over extended periods of time. Heavy loads over multiple days may need to be carried. Previous experience is highly crucial in order to prepare your body endure the high level of mental and physical toughness from both altitude and terrains.

### **Expedition Fitness**

When it comes to expedition the more fitter you are and more stronger the better your chances of successfully climbing to the summit and most of all enjoying the expedition. The grading system gives you an indication of the level required for each expedition both technically and physically. It is very important that you train and build your level of fitness depending on your choice of expedition and whilst on expedition if your fitness is deemed to be inadequate our leaders would ask you to remain at camp. Please discuss with our guiding leaders on how you feel and weather you can actually make that push during all climbing/expedition, as we take your and staff safety seriously and would not want any unchecked incidents or miss out on your successful summit bid.

### **Adventure Travel – Accuracy of Itinerary**

It is on our best interest to operate our expeditions as printed in the itinerary but due to unseen circumstances it may be necessary to make some changes as a result of flight schedules, climatic conditions, limitations of infrastructure or other operational factors. As a consequence, the order or location of overnight stops and the duration of the day may vary from those outlined. We would ask for your patience in this case as a lot of these can be out of our hands and we will best decide to plan alternatives. Our assigned leader is responsible for the overall safety of the whole team during the expedition and will encourage the use of safe climbing practises during the expedition. They will ensure that every opportunity is taken to fulfil the objectives described in the trip's outline itinerary, but have the freedom to modify any plans subject to weather, delays or unforeseen circumstances which are deemed to be out of the control of Namas Adventure. The leader will maintain a good team spirit and attempt to keep morale high for the whole group. Wherever possible the leader will keep the Namas Adventure office informed of team progress and any emergency situations that may arise.
